Title: cFood (Free Food App)

Description: Free food offers come around all the time, but it's sometimes hard to find out about them and take advantage of the opportunity. This app would allow users to post about locations and times of when the food is available. Other users can then verify if the offer is valid or tell people not to waste their time if someone made it up.

Platform: Mobile App (Android/IOs)

Programming Languages:

Languages	Andrew	Austin	Rachel	Dylan	Leif
Java	Beginner	Beginner	Beginner	Beginner	
Swift	Intermediate	None	None	None	
XML/JSON	Beginner	Intermediate	Beginner	Beginner	
HTML/CSS	Intermediate	Intermediate	Intermediate	Intermediate	
Others	Sorta	Intermediate	None	Some	

Functionality
- Users can sign up
- Users can log in
- Users can report locations and time when free food can be found
- Other users can verify that there is food at the described location
